This new book by international experts in psycho-oncology has arisen from the teaching academies offered by the International Psycho-oncology Society. It distills the wisdom and experience from the training manuals dedicated to individual psychological therapies and combines them into an accessible handbook for clinicians in cancer care today. The editors have brought together leading researchers and therapists, who provide accounts of the prominent models of psychotherapy currently being used in cancer care, the key themes they address and the essential techniques needed to apply each approach successfully. Helpful clinical illustrations are woven throughout the book to make overt the strategies found in each model. Provides practical guidance about how to deliver a range of individual, group, couple and family interventions that have proven utility in cancer care. Describes comprehensively each model of psychotherapy as taught by experts delivering the International Psycho-Oncology Society's Educational Academy on cancer care for patients and their families. Features practical suggestions on therapy delivery from the world's leading proponents of each therapy. Serves as a valuable tool to assist teaching and to facilitate research into psychological interventions in oncology, palliative care and bereavement. Functions as a readily accessible resource for clinicians struggling to support someone effectively, through its provision of insight into the common challenges and traps that arise when providing patients with emotional support. This practical handbook will help not only psychiatrists, psychologists and social workers but also physicians, surgeons, general practitioners and nurses interested in better understanding and supporting the patients and families they care for.

This useful guide educates students in the preparation of literature reviews for term projects, theses, and dissertations. The authors provide numerous examples from published reviews that illustrate the guidelines discussed throughout the book. ? New to the seventh edition: ? Each chapter breaks down the larger holistic review of literature exercise into a series of smaller, manageable steps Practical instructions for navigating today's digital libraries Comprehensive discussions about digital tools, including bibliographic and plagiarism detection software Chapter activities that reflect the book's updated content New model literature reviews Online resources designed to help instructors plan and teach their courses (www.routledge.com/9780415315746).

Written by experts from London's renowned Royal Free Hospital, *Textbook of Plastic and Reconstructive Surgery* offers a comprehensive overview of the vast topic of reconstructive plastic surgery and its various subspecialties for introductory plastic surgery and surgical science courses. The book comprises five sections covering the fundamental principles of plastic surgery, cancer, burns and trauma, paediatric plastic surgery and aesthetic surgery, and covers the breadth of knowledge that students need to further their career in this exciting field. Additional coverage of areas in which reconstructive surgery techniques are called upon includes abdominal wall reconstruction, ear reconstruction and genital reconstruction. A chapter on aesthetic surgery includes facial aesthetic surgery and blepharoplasty, aesthetic breast surgery, body contouring and the evolution of hair transplantation. The broad scope of this volume and attention to often neglected specialisms such as military plastic surgery make this a unique contribution to the field. Heavily illustrated throughout, *Textbook of Plastic and Reconstructive Surgery* is essential reading for anyone interested in furthering their knowledge of this exciting field. This book was produced as part of JISC's Institution as e-Textbook Publisher project. Find out more at <https://www.jisc.ac.uk/rd/projects/institution-as-e-textbook-publisher>
