Over the past hundred years, gulls have been brought ashore by modernity. They now live not only on the coasts but in our slipstream following trawlers, barges, and garbage trucks. They are more our contemporaries than most birds, living their wild lives among us in towns and cities. In many ways they live as we do, walking the built-up world and grabbing a bite where they can. Yet this disturbs us. We've started fearing gulls for getting good at being among us. We see them as scavengers, not entrepreneurs; ocean-going aliens, not refugees. They are too big for the world they have entered. Their story is our story too. Landfill is the original and compelling story of how in the Anthropocene we have learned about the natural world, named and catalogued it, and then colonized it, planted it, or filled it with our junk. While most other birds have gone in the opposite direction, hiding away from us, some vanishing forever, gulls continue to tell us how the wild can share our world. For these reasons Landfill is the nature book for our times, groundbreaking and genre-bending. Without nostalgia or eulogy, it kicks beneath the littered surface of the things to discover stranger truths.

This book covers a variety of topics related to the Industry 4.0 concept, with a special emphasis on the efficiency of production processes and innovative solutions for smart factories. It describes tools supporting this concept in both the mechanical engineering and biomedical engineering field. The content is based on papers presented at the 6th International Scientific-Technical Conference MANUFACTURING 2019, held on 19-22 May 2019, in Poznan, Poland. Virtual reality, simulation of manufacturing systems, additive manufacturing, big data analysis, automation and application of artificial intelligence, as well as economic and social issues related to the integration of those technologies are just some of the topics discussed here. All in all, the book offers a timely and practice-oriented reference guide for researchers and practitioners, and is expected to foster better communication and closer cooperation between universities and their business and industrial partners.

A century after the Armistice and the associated peace agreements that formally ended the Great War, many issues pertaining to the UK and its empire are yet to be satisfactorily resolved. Accordingly, this volume presents a multi-disciplinary approach to better understanding the post-Armistice Empire across a broad spectrum of disciplines, geographies and chronologies. Through the lens of diplomatic, social, cultural, historical and economic analysis, the chapters engage with the histories of Lagos and Tonga, Cyprus and China, as well as more obvious geographies of empire such as Ireland, India and Australia. Though globally diverse, and encompassing much of the post-Armistice century, the studies are nevertheless united by three common themes: the interrogation of that transitional 'moment' after the Armistice that lingered well beyond the final Treaty of Lausanne in 1924; the utilisation of new research methods and avenues of enquiry to compliment extant debates concerning the legacies of colonialism and nationalism; and the common leitmotif of the British Empire in all its political and cultural complexity. The centenary of the Armistice offers a timely occasion on which to present these studies.
