Evaluation has never been higher on the agenda. Policies and programmes in health care change faster than ever, yet the methodological demands of rigorous evaluations lead to them becoming more complex, time consuming, and often distant from everyday service experience. Too often, by the time evaluation information becomes available, things have moved on and the information lacks saliency.

Action Evaluation of Health Programmes and Changes: A Handbook for a User-Focused Approach: Ovretveit, John: Amazon.sg: Books

Annotation. Describes the user-focused action evaluation approach for evaluating health programmes, policies and changes. It shows that evidence for making decisions can be gathered using a broader range of methods than is usual recognised in healthcare. In asking 'evaluation for whom and for what?', the book defines validity of evidence in relation to usefulness as well as in terms of whether systematic methods were followed. Contents: Part 1: How to make an evaluation; Part 2: Evaluation Tools; Part 3: Specific subjects.

Healthcare Performance and Organisational Culture examines the evidence for a relationship between organisational culture and organisational performance in the health care sector. This book provides essential information to assist health managers improve the performance of their organisation by addressing the factors of style and culture, using practical tools throughout to measure them and link them to performance. It comprehensively examines the theoretical basis of the relationship between organisational culture and performance and assesses the various tools designed to measure or assess the culture of organisations. All healthcare professionals and clinicians with management responsibilities will find this book essential reading.

Over half the world's rural population, and many in urban slums, have minimal access to health services. This book describes how to set up new, and develop existing, community-based health care for, by and with, the community.

The Second Edition of Health Program Planning and Evaluation will help you to systematically develop, thoughtfully implement, and rigorously evaluate health programs across a variety of health disciplines. This thorough revision includes updated examples and references throughout, reflecting the major changes within the field. This outstanding resource prepares students and professionals to become savvy consumers of evaluation reports and prudent users of evaluation consultants. It presents practical tools and concepts in language suitable for both the practicing and novice health program planner and evaluator.

This workbook applies the CDC Framework for Program Evaluation in Public Health. The purpose of this workbook is to help public health program managers, administrators, and evaluators develop a joint understanding of what constitutes an evaluation plan, why it is important, and how to develop an effective evaluation plan in the context of the planning process. This workbook is intended to assist in developing an evaluation plan but is not intended to serve as a complete resource on how to implement program evaluation.

This work provides background and application information needed to plan, implement and evaluate health promotion programmes in a variety of settings.

Programmes in the areas of community health, medical care and worksites are examined in detail and presented in an accessible format.

Health interventions that are effective in developed countries may not be as effective in developing countries given the differing social, economic, cultural, and infrastructure factors that may affect a program's implementation and outcomes. This monograph is intended to promote an understanding of why program evaluation is a critical component of any health intervention and to stimulate discussion on ways to make evaluation of health interventions in developing countries more rigorous.

This book is the result of the WHO European Working Group on Health Promotion Evaluation which examined the current range of qualitative and quantitative evaluation methods to provide guidance to policy-makers and practitioners. It includes an extensive c

This handbook was designed to provide up-to-date and practical guidance on national health planning and strategizing for health. It establishes a set of best practices to support strategic plans for health and represents the wealth of experience accumulated by WHO on national health policies, strategies, and plans (NHPSPs). WHO has been one of the leading organizations to support countries in the development of NHPSPs. The focus on improving plans has grown in recent years in recognition of the benefits of anchoring a strong national health sector in a written vision based on participation, analysis, and evidence.
