As contrary as it sounds, "planning" -- as we traditionally understand the term--can be the worst thing a company can do. Consider that volatile weather events disrupt trusted supply chains, markets, and promised delivery schedules. Ever-shifting geo-political tensions, as well as internal political upheaval within U.S. and global governments, derail long-planned new ventures. Technology failures block opportunities. Competitors suddenly change their product or release date; your team cannot meet the pace of innovations in your market niche, leaving you sidelined. There are myriad ways in the current business environment for a company's well-considered business plans to go awry. Most business schools continue to prepare managers to be effective in stable and predictable environments, conditions that, if they ever existed at all, are long gone. The Agility Shift

shows business leaders exactly how to make the radical mindset and strategy shift necessary to create an agile, entrepreneurial organization that can innovate and thrive in complex, ever-changing contexts. As author Pamela Meyer explains, there is much more involved than a reconfiguration of the org chart and job descriptions. It requires relinquishing the illusion of control at the very foundation of most management training and business practice. Despite most leaders' approaches, "Agility is not simply accelerated planning." Unlike many agility books on the market, The Agility Shift provides specific, actionable strategies and tactics for leaders at all levels of the organization to put into practice immediately to improve agility and achieve results.

Every year, over 10,000 business books are published-and that's before you add in the hundreds of thousands of articles, blogs, and video lectures that are produced. Leaders can't possibly hope to digest it all, and writers increasingly sensationalize and spin their ideas in order to be noticed. The result? Put quite simply, the field of management thinking is in danger of losing the plot. In this new book, Scott Keller and Mary Meaney-Senior Partners at McKinsey & Company, the world's preeminent management consultancy-cut to the chase by answering the 10 most important and timeless questions that every

leader needs to answer in order to maximize the performance and health of their organization. What's more, the authors recognize that great leaders may not have time for long-winded business books. In *Leading Organizations*, answers are kept to the essentials—hard facts, counter-intuitive insights, and practical steps—all presented in an accessible and highly visual format. If there's one essential business book you should read—ever—it's this one.

Becoming a world-class company demands agile manufacturing—a responsive method of expeditiously delivering products at a lower cost. For organizations which desire to increase profits while minimizing liability, this text is an invaluable guide. It explains how to introduce flexibility into manufacturing facilities through the modification of current computer software and systems. Rather than taking the cost-prohibitive approach of discarding the processes a company already has in play and starting from scratch, organizations can achieve their goal of becoming agile manufacturers by modifying existing systems. The author utilizes numerous case studies from companies such as Xerox, General Motors, Harley-Davidson, and Motorola to explore the current software movement, from MRP II (benefits and limitations) to alternative methods employed by companies attempting to align their software with new world class methodologies. The task environment of NGOs is changing rapidly and significantly, making new demands on their management and leadership. This Companion discusses the complexities involved. It illustrates how NGOs can maintain performance and remain agile amidst increasing uncertainties. These factors include the position of NGOs in civil society, their involvement in governance and coping with the effects of the securitisation of international aid. Complementing The Earthscan Reader in NGO Management, selected contributions and specially commissioned pieces from NGO thought-leaders and practitioners, provide the reader with insights on the emerging thinking, competences and practices needed for success in managing and leading tomorrow's NGOs.

Achieve unprecedented business value by fostering true employee engagement Many organizations fail to realize and harness the power of their most valuable asset—their employees. Though they can be developed into a true competitive advantage, engagement isn't attainable if the employee isn't invested in the company's overall success. Agile Engagement offers business leaders a concrete strategy for building, maintaining, and utilizing employee engagement to

achieve the highest level of business success. The key? Employees must feel like they are a part of their company's culture instead of having it handed down to them. Stories of failed employee engagement initiatives abound, and they all have one thing in common: they begin from the premise of "initiative" rather than "employee." True engagement occurs when an employee's heart and mind are activated in a way that leads to their motivation and commitment to positively impact the company's goals and vision. This book shows you how to create an environment that stresses a culture of unity at all levels by showing you how to: Create a clear, compelling vision and corresponding engagement strategy through the Engagement Canvas Communicate your unique culture strategy throughout all levels of your company Foster grassroots, employee-led engagement initiatives Improve engagement continuously with the Emplify Score tool Agile Engagement provides a deeper look into real engagement, helping you foster a work environment that's rewarded with unsurpassed productivity, innovation, and competitive advantage, as well as employees who feel valued, respected, and heard.

Offers advice on how to lead an organization into change, including establishing a sense of urgency, developing a vision and strategy, and generating short-term wins.
