Anemone baldensis; A. sylvestris | Constantin Freiherr Von

Description. A beautiful, long-lived plant bearing golden-eyed, creamy-white flowers in spring and early summer on shortish stems holding jaggedly bisected leaves. It grows, predictably, on Mount Baldo in Italy!

ANEMONE BALDENSIS SEEDS — Plant World Seeds

Anemone Baldensis A Sylvestris Ettingshausen Anemone sylvestris is native to meadows and dry deciduous woodlands of central and western Europe. Allohexaploid A. baldensis (2n = 6x = 48) is representative of the Baldensis group, a small group of species from the arctic and alpine tundra of North America (A. parviflora, A. lithophila, A ...

Download Anemone Baldensis A Sylvestris Ettingshausen

Von Ettingshausen, an Austrian botanist, palaeontologist and mineralogist, was a keen supporter of nature printing and published a number of other works using the process (the Bradley Bibliography lists 24 titles under his name). Pokorny worked with von Ettingshausen to improve the quality of nature printing and worked as a teacher and lecturer ...

Anemone baldensis; A. sylvestris by ETTINGSHAUSEN

Anemone demissa, from SW China, is more dwarf but otherwise similar and also quite a choice plant for rock garden enthusiasts. While the previous two have fuzzy, dissected leaves, Anemone rivularis has coarser leaves more like those of A. sylvestris. It is one of the tallest species in this group (to 90 cm) with umbels of 3-5 white flowers.

Anemone Baldensis A Sylvestris Ettingshausen Constantin

The genus Anemone contains about 120 species from around the world in the North Temperate Zone. Its species name describes the tendency of this plant to dwell in the "sylvan" or forest environments of Europe, southwest Asia and Siberia. This A. sylvestris was known in ancient times with only a few cultivars, unlike the Japanese anemones that came to the west far later and spawned a wealth of garden varieties.

Description. Nodding white flowers with yellow centres open in late spring, this plant getting its common name from the way the flower buds emerge on bent stems, so they hang like snowdrops. They then straighten up and face outwards as the perfumed flowers start to open, petals catching the breeze, making them look like butterflies.
