Aqua Lung is the name that first introduced the world to Scuba diving in 1943 when Jacques-Yves Cousteau and Émile Gagnan developed the first "Aqua-Lung." The excitement and adventurous spirit of that first dive continues today and is reflected in Aqua Lung's dedication to quality and innovation in the manufacturing of the world's best professional and recreational scuba diving equipment.

A SCUBA in octopus configuration is defined as an octopus second stage connected with the same first stage of the primary regulator. The EN250:2014 defines minimum safety requirement, testing and maximum depth (30 meters) in case the SCUBA is used by two divers at the same time with the octopus second stage used as an auxiliary emergency breathing escape device by another diver. 5. TECHNICAL ...

Over 1,000 total pages .... INTRODUCTION 1-1.1 Purpose. This chapter provides a general history of the development of military diving operations. 1-1.2 Scope. This chapter outlines the hard work and dedication of a number of individuals who were pioneers in the development of diving technology. As with any endeavor, it is important to build on the discoveries of our predecessors and not repeat mistakes of the past. 1-1.3 Role of the U.S. Navy. The U.S. Navy is a leader in the development of modern diving and underwater operations. The general requirements of national defense and the specific requirements of underwater reconnaissance, demolition, ordnance disposal, construction, ship maintenance, search, rescue and salvage operations repeatedly give impetus to training and development. Navy diving is no longer limited to tactical combat operations, wartime salvage, and submarine sinkings. Fleet diving has become increasingly important and diversified since World War II. A major part of the diving mission is inspecting and repairing naval vessels to minimize downtime and the need for dry-docking. Other aspects of fleet diving include recovering practice and research torpedoes, installing and repairing underwater electronic arrays, underwater construction, and locating and recovering downed aircraft.
