Introduction We cannot predict the future
– If a parent carries 2 different alleles for a certain gene, there is no way to be sure which allele will be inherited by its offspring The only thing we can do is predict the odds by applying Mendel's principles

Genetics and Probability. Probability. is the likelihood that an event will occur. Scientists use probability to predict the outcomes of genetic crosses. If a coin is flipped once, the chance that it will be heads is $1/2$. If it is flipped three times in a row, the probability of flipping all heads
