Matching Game
Match 3 is a generic style of video or computer game, in which the player attempts to rearrange shapes or objects in a playing field in order to get three or more identical objects connected (sometimes in a row, otherwise just sharing

a side), at which point they disappear and grant the player points. This rearrangement is done by exchanging the places of two tiles at a time, and, in recent variations, it is made more difficult by limiting the player to one move before “clearing” pieces.

endless. Jewel

Academy for example
uses a traditional
match three approach
using brightly colored
gems and fun
gameplay.
