'Simply put, feminism is a movement to end sexism, sexist exploitation, and oppression.' So begins *Feminism is for Everybody*, a short, accessible introduction to feminist theory by one of its liveliest and most influential practitioners. Designed to be read by all genders, this book provides both a primer to the question 'what is feminism?' and an argument for the enduring importance of the feminist movement today. Beginning with a broad survey of feminism's most important themes and concerns, bell hooks demystifies contentious concepts and turns apparent ideology into common sense. Providing a critical evaluation of the successes and failures of contemporary feminism, she looks at a wide variety of topics including reproductive rights, sexual violence, race, class and work. hooks encourages us to demand alternatives to patriarchal, racist and homophobic culture and thereby to seek out a different future.

What is feminism? In this short, accessible primer, bell hooks explores the nature of feminism and its positive promise to eliminate sexism, sexist exploitation, and oppression. With her characteristic clarity and directness, hooks encourages readers to see how feminism can touch and change their lives—to see that feminism is for everybody.

A classic work of feminist scholarship, *Ain't I a Woman* has become a must-read for all those interested in the nature of black womanhood. Examining the impact of sexism on black women during slavery, the devaluation of black womanhood, black male sexism, racism among feminists, and the black woman's involvement with feminism, hooks attempts to move us beyond racist and sexist assumptions. The result is nothing short of groundbreaking, giving this book a critical place on every feminist scholar's bookshelf.

"Johanna Brenner writes with a clarity of purpose that arises out of a lifetime of participation in the struggles of working-class women. A major voice on the American left." --Mike Davis, May 2000

Is there a future for feminism? The debate over the direction and politics of the women's movement has been joined recently by post-feminists and anti-feminists, in addition to competing feminist perspectives. In *Women and the Politics of Class*, Johanna Brenner offers a distinctive view, arguing for a strategic turn in feminist politics toward coalitions centered on the interests of working-class women. *Women and the Politics of Class* engages many crucial contemporary feminist issues-abortion, reproductive technology, comparable worth, the impoverishment of women, the crisis in care-giving, and the shredding of the social safety net through welfare reform and budget cuts. These problems, Brenner argues, must be set in the political and economic context of a state and society dominated by the imperatives of capital accumulation. Drawing on historical explorations of the labor movement and working-class politics, Brenner provides a fresh materialist approach to one of the most important issues of feminist theory today: the intersection of

race, ethnicity, nationality, gender, sexuality, and class.

The Politics of Everybody examines the production and maintenance of the terms 'man', 'woman', and 'other' within the current political moment; the contradictions of these categories; and the prospects of a Marxist approach to praxis for queer bodies. Few thinkers have attempted to reconcile queer and Marxist analysis. Those who have propose the key contested site to be that of desire/sexual expression. This emphasis on desire, Lewis argues, is symptomatic of the neoliberal project and has led to a continued fascination with the politics of identity. By arguing that Marxist analysis is in fact most beneficial to gender politics within the arena of body production, categorization and exclusion, Lewis develops a theory of gender and the sexed body that is wedded to the realities of a capitalist political economy. Boldly calling for a new, materialist queer theory, Lewis defines a politics of liberation that is both intersectional, transnational, and grounded in lived experience. With a new preface, Lewis discusses the argument for an explicitly Marxist understanding of trans rights - an understanding grounded in solidarity and materialist/scientific queer analysis. She also discusses the new wave of Marxist Social Reproduction Theory that has emerged since the first edition, family abolition, and the complexities of building an internationalist Marxist movement that is in solidarity with queer and trans struggles, attentive to women's realities, and one that refrains from imposing Western definitions (particularly American/Anglo definitions) onto global movements for liberation.

A vibrantly illustrated introduction to intersectional feminism for next-generation changemakers. Who has power? Who creates the rules? How do identities intersect? In this next book in the Empower the Future ?series, explore the points where gender, race, class, ability, sexuality, and culture meet. Then read on. In this new feminist classic, the focus is intersectional from the beginning, not just as an add-on.
