STANDARD VALUATION LAW Table of Contents

The gross premium valuation reserve (GPV) shall be in accordance with the notifications of the Insurance Commission concerning valuation of assets and liabilities of life insurance companies. Actuaries shall consider relevant issues or factors and take into consideration all inward and outward cash flows.

Notification of the Commissioner re: Standard of Actuarial ...

A gross premium valuation (GPV) involves a projection of the liability premiums, benefits, and expenses. It determines the value of a book of business based on the present value of the benefits and expenses less gross premiums. A liability model is necessary, along with a projection based on that model and reasonable.

A PUBLIC POLICY PRACTICE NOTE

Net premium valuation is a reserve methodology, where net premiums are the amounts necessary to pay benefits according to certain mortality and interest assumptions. Company expenses are not reflected in the net premium reserve, nor are there any explicit margins for profits or adverse experience. This uses theoretical premium with no link to the actual premium paid.

Net Premium Valuation | Society of Actuaries Actuarial Toolkit

Gross Premium Valuation (GPV) GPV Reserves = PV all future liabilities (include expenses and discretionary benefits) less PV future office premiums -

Presentation to Persatuan Aktuaris Indonesia 16 December ...

This is the specified probabilistic plan whereby the premium value is determined. We will explore several such plans, the first and probably the most important of which is: Equivalence Principle Under the equivalence principle the premium is determined so that theexpected value of the future loss function (net or gross) is equal to zero. That is,

Chapter 6 - Premium Calculations

It involves calculating a present value for the contractual liabilities of a contract, and deducting the value of future premiums. Both contractual liabilities, and future premiums in this calculation allow only for mortality and interest.

Net premium valuation - Wikipedia

If in any contract year the gross premium charged by a company on any policy or contract is less than the valuation net premium for the policy or contract calculated by the method used in calculating the reserve thereon but using the minimum valuation standards of mortality and rate of interest, the minimum reserve required for such policy or contract shall be the greater of either the reserve calculated according to the mortality table, rate of interest, and method actually used for such ...
