Briefing Handbook Of Industrial Drying 4th

Drying is one of the most energy-intensive unit operations  
in industrial processing. In case of evaporative drying, a  
large part of the required energy is used in the form of  
thermal heat (i.e., heat generated directly by combustion of  
fuel or indirectly from steam or using hot oil through a  
heat exchanger) in the drying process.

Handbook of Industrial Drying, Fourth Edition

Handbook of Industrial Drying, Fourth Edition.

Author/Affiliation. Arun S. Mujumdar, National University of  
Singapore. Industrial drying continues to attract increasing  
attention from industry and academia in view of its  
inherently energy-intensive characteristics. This completely  
revised fourth edition includes 16 new chapters to ensure  
readers benefit from the latest developments in the field.
