When Amos wins a “Why I Love My Dog” Contest, he and Dunc are off on the Caribbean cruise of their dreams! But there’s something downright fishy about Amos’s suitcase, and before they know it, the two best friends wind up with more high seas adventure than they’d bargained for. Can Dunc and Amos figure out who’s out to get them and salvage what’s left of their vacation?

This book recalls that a sapiential (wisdom) consciousness is central to the New Testament writings and remained the mode of theological understanding in Eastern and Western traditions for more than twelve centuries. It proposes the rediscovery—or, better—a new birth of this theology and understanding but with a new scope and new power for our time.

Interviews with the Disney artist who created Scrooge McDuck and many well-loved comic books
Disney artist Carl Barks (1901-2000) created one of Walt Disney’s most famous characters, Scrooge McDuck. Barks also produced more than 500 comic book stories. His work is ranked among the most widely circulated, best-loved, and most influential of all comic book art. Although the images he created are known virtually everywhere, Barks was an isolated storyteller, living in the desert of California and preferring to labor without public fanfare during most of his career. He created work of such exceptional quality that he was accorded the greatest autonomy of any Disney artist. He is the only comic book artist ever to receive a Disney Legends award. The influence of Barks’s work on such filmmakers as George Lucas and Steven Spielberg and on such artists as Gottfried Helnwein has extended Barks’s significance far beyond the boundaries of comics. After Barks’s death at the age of ninety-nine, Roy Disney praised him for his “brilliant artistic vision.” Carl Barks: Conversations is the only comprehensive collection of Barks’s interviews. It ranges chronologically from the very first one (with Malcolm Willits, the fan who uncovered Barks’s identity) to the artist’s final conversations with Donald Ault in the summer of 2000. In between are interviews conducted by J. Michael Barrier, Edward Summer, Bruce Hamilton, and others. Several of these interviews are published here for the first time. Ault’s friendship with Barks, ranging over a period of thirty years, provides an unusually intimate resource not only for standard Q&A interviews but also for casual conversations in informal settings. Carl Barks: Conversations reveals previously unknown information about the life, times, and opinions of one of the master storytellers of the twentieth century. Donald Ault, a professor of English at the University of Florida, is the author of Narrative Unbound: Re-Visioning William Blake’s The Four Zoas and Visionary Physics: Blake’s Response to Newton. His work has been published in Studies in Romanticism, The Wordsworth Circle, Modern Philology, and The Comics Journal.

A compendium of best practices and implementation wisdom, Pro BizTalk 2009 is a revision of the highly-successful and best-selling Pro BizTalk 2006. The book has been fully updated to cover developments in BizTalk 2009. You’ll find chapters on topics such as developing WCF-compliant adapters using the WCF LOB adapter SDK, connecting BizTalk to IBM mainframe line-of-business applications and data using the Host Integration Server adapter, and riding the Enterprise Service Bus. All other chapters in the book have been updated to reflect developments in BizTalk 2009. Pro BizTalk 2009 is based upon real feedback from BizTalk developers. It is written by recognized experts George Dunphy and Sergei Moukhnitski, backed by a team of top-notch co-authors. The book is a labor of love in which the authors share their experiences and expertise to teach you the art of creating a BizTalk solution using the right tools from the BizTalk 2009 toolbox. Fully updated to cover developments in BizTalk 2009 Focuses on the art of creating a BizTalk solution by helping readers choose the right tool from the BizTalk toolbox for the task at hand Based upon the real-life experience of authors with many years of practice implementing BizTalk solutions for large enterprises

Paralyzing the Rider and the Horse is vomited by the Holy Ghost to enable the reader deal with stubborn pursuers. It enacts the drama of victory over satanic forces. With allusion to powerful events in the scripture and the use of practical, true life experiences, the author for the umpteenth time, maintains the fact that students in the school of spiritual warfare can always demonstrate the victory which Christ won on the cross. This book will lead you into the realm of uncommon victory.

A Simon & Schuster eBook. Simon & Schuster has a great book for every reader.

This is the eBook version of the printed book. This Short Cut presents a sampling of custom functions that we’ve found useful, or that serve as good examples of functions in our day-to-day practice. The functions are broken into groups according to their purpose, much as FileMaker’s calculation functions are. Please note that these functions are meant as examples—although the examples were not tested exhaustively, nor is this collection meant to be comprehensive. We hope you’ll find some of them helpful directly, or that reading and analyzing others might provide a springboard for your own ideas. Table of Contents Number Calculations Date Calculations Text and Data Conversions Email Tools List Handlers Developer Tools System Constants Toolkit for Complex Data Structures Data API Within FileMaker Data Tree Using XML as a Data Structure Path-Based Selections The Functions

Could you lose weight if you put \$20,000 at risk? Would you finally set up your billing software if it meant that your favorite charity would earn a new contribution? If you’ve ever tried to meet a goal and came up short, the problem may not have been that the goal was too difficult or that you lacked the discipline to succeed. From giving up cigarettes to increasing your productivity at work, you may simply have neglected to give yourself the proper incentives. In Carrot and Sticks, Ian Ayres, the New York Times bestselling author of Super Crunchers, applies the lessons learned from behavioral economics—the fascinating new science of rewards and punishments—to introduce readers to the concept of “commitment contracts”: an easy but high-powered strategy for setting and achieving goals already in use by successful companies and individuals across America. As co-founder of the website stickK.com (where people have entered into their own “commitment contracts” and collectively put more than \$3 million on the line), Ayres has developed contracts—including the one he honored with himself to lose more than twenty pounds in one year—that have already helped many find the best way to help themselves at work or home. Now he reveals the strategies that can give you the impetus to meet your personal and professional goals, including how to • motivate your employees • create a monthly budget • set and meet deadlines • improve your diet • learn a foreign language • finish a report or project you’ve been putting off • clear your desk Ayres shares engaging, often astounding, real-life stories that show the carrot-and-stick principle in action, from the compulsive sneezer who needed a “stick” (the potential loss of \$50 per week to a charity he didn’t like) to those who need a carrot with their stick (the New York Times columnist who quit smoking by pledging a friend \$5,000 per smoke . . . if she would do the same for him). You’ll learn why you might want to hire a “professional nagger” whom you’ll do anything to avoid—no, your spouse won’t do!—and how you can “hand-tie” your future self to accomplish what you want done now. You’ll find out how a New Zealand ad exec successfully “sold his smoking addiction,” and why Zappos offered new employees \$2,000 to quit cigarettes. As fascinating as it is practical, as much about human behavior as about how to change it, Carrots and Sticks is sure to be one of the most talked-about books of the year.

The book contains the proceedings of the 14th International Symposium on Capture Gamma-Ray Spectroscopy and Related Topics held at the University of Guelph from August 28 through September 2, 2011. The proceedings cover topics of nuclear structure, nuclear reactions, nuclear astrophysics, fundamental symmetries in nuclei, statistical aspects of nuclei, and new techniques and applications, from forefront researchers in their fields.
