We believe a European action plan is needed to support member states in achieving the Sustainable Development Goal (SDG) of eliminating HIV/AIDS by 2030. Only by setting concrete and timely policy measures to support and encourage member states to strengthen their efforts in the fight against HIV, will we be able to finally bridge the east-west gap and move as One Europe toward the

In Western Europe, the routes of transmission of HIV are diverse, including paid sex, sex between men, intravenous drugs, mother to child transmission and heterosexual sex. However, many new infections in this region occur through contact with HIV-infected individuals from other regions. In some areas of Europe, such as the Baltic countries, the most common route of HIV transmission is through injecting drug use and heterosexual sex, including paid sex. The adult prevalence in Europe in 2018 var
