YOU CAN'T MAKE THIS STUFF UP! Here is a hilarious collection that catches real-life knuckleheads in outrageous acts of brazen stupidity, giving new meaning to that famous four-letter word: "DUH!" * The Oregon resident who was waxing his 1984 Pontiac--and somehow managed to shove the antenna up his nose . . . GRANDMOTHER OF EIGHT MAKES HOLE IN ONE * The Atlanta Braves pitcher who was treated for five-inch-long welts after he tried to iron his polo shirt while wearing it . . . MINERS REFUSE TO WORK AFTER DEATH * The inmate at a Chesapeake Correctional Facility who filed a five million dollar lawsuit against himself . . . DRUNK GETS NINE MONTHS IN VIOLIN CASE * The woman who couldn't stand the discomfort of having a callus on her right foot, so she blew off her big toe with a shotgun . . . Radio personality John "Kato" Machay's lively compilation of news stories, headlines, and courtroom gaffes proves hands down that truth is dumber than fiction! REMEMBER: To err may be human, but to laugh out loud is divine.

A look at the German High Command during World War II challenges the myth that the German Generals could have won the war had Hitler not interfered, and maps out the history and the personalities of the German Command Structure.

Principles and Practice of Surgery is the surgical companion textbook to the international medical bestseller Davidson ' s Principles and Practice of Medicine. It is a comprehensive textbook for both the surgical student and trainee, guiding the reader through key core surgical topics which are encountered throughout an integrated medical curriculum as well as in subsequent clinical practice. Although sharing the same format and style as Davidson ' s Principles and Practice of Medicine, this text is complete in itself, thus enabling the student to appreciate both the medical and surgical implications of diseases encountered in surgical wards. A three-section textbook of surgical principles and regional clinical surgery. The textbook presents a comprehensive account of international surgical practice, taking into account variations in the disease patterns and management approaches throughout the world. Superbly presented with line drawings, high quality radiographic images and colour photographs. Presented in similar form to its sister textbook Davidson ' s Principles and Practice of Medicine. Full online and ebook version available as part of Student Consult. A new chapter on Evidence-based practice and professional development. An expanded chapter on Surgical preparation includes an account of the main issues surrounding day case surgery. A new International Advisory Board based in India, South Africa, South-east Asia and Europe has advised throughout on the structure and content of the book. Consequently the text has been updated to reflect changes in understanding, evidence and practice, and to keep the contents in line with undergraduate and postgraduate surgical curricula The evidence-based revision boxes that focus on major international guidelines have been thoroughly updated. The text on tropical conditions such as tropical pancreatitis, tuberculosis affecting the various organ systems and filarial lymphoedema has been expanded. Innovations useful in the practice of surgery in resource-poor environments have been included. The text gives a global emphasis on epidemiological and cultural issues such as problems associated with directed transfusion of blood products from first degree relatives, the issues of informed consent and patient autonomy. A comparison of SI and non-SI reference ranges for commonly used laboratory values has been added.

This beginner's French textbook offers a traditional approach, with a focus on a functional view of language, stress on culture, and the use of authentic material. It uses a large number of texts on contemporary topics as a base for listening and reading practice, and seeks to develop students' writing and speaking skills by means of carefully sequenced activities leading to self-expression. It presents grammar gradually, and in the context of authentic texts and actual spoken usage.

Chemistry of the Environment, 3rd Edition, is a concise, clear and current account of today's environmental issues and the science one needs to understand them. This intermediate-level text, which recommends General Chemistry as a prerequisite, systematically lays out themes of sustainability, atmosphere, hydrosphere, lithosphere and biospheres, while stressing the interconnectedness of environmental problems and solutions. The completely revised third edition explains the natural chemical cycles, and how humans affect them. It also analyzes strategies for ameliorating human impacts. This stimulating new text uses concise, straightforward language and an accessible narrative style to inform quantitative thinking.

This Selected Issues paper discusses the economics of energy price reform in the Islamic Republic of Iran. Economic policies in Iran have traditionally relied on the abundant availability of energy at a low price to finance the country ' s economic development. Low domestic energy prices have resulted in excessive use of energy. Iran ' s domestic energy use has been high by international standards, and energy demand growth has exceeded the rate of growth of per capita income, in contrast to the experience of the majority of low and high-income countries.
