aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of

being. It's the
experience of being
physically and mentally
present in the moment,
where every sense is
sharply attuned to the
ride. Your mind
becomes silent to the
chatter of daily life, and
everyday problems
seem to dissolve. You
feel a deeper
appreciation for life.

Your body responds to

this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery.

This is "the Zone."

Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the

development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.
