Some oil furnaces have a pump strainer, which is located on the pump attached to the burner/ blower unit. Clean this strainer when you clean the oil filter. Here's how: Step 1: Unbolt cover of pump housing (where oil line enters burner), and lift off cover. Step 2: Remove thin gasket around rim. Find and remove strainer, which is a cylindrical or cup-shape wire mesh screen.

I have a 20 yr old Lincoln Oil Furnace Model LBO 125 DA. I am having trouble with my side wall power vent not allowing the furnace to continue running for more than two or three minutes before it shuts down. When I first got the furnace I went through two vent motors in about three years. Then consulted a motor specialist and showed him the motor.
