Human and Machine Consciousness presents a new foundation for the scientific study of consciousness. It sets out a bold interpretation of consciousness that neutralizes the philosophical problems and explains how we can make scientific predictions about the consciousness of animals, brain-damaged patients and machines.

Researcher proposes new theory of consciousness

Welcome to the Journal of Consciousness (JofC). The JofC publishes research papers and articles related to the study of the consciousness. Its aim is to provide a forum for the unbiased publication of investigation and exchange of ideas associated with the analysis of the physical and non-physical attributes and abilities of the consciousness, and to deepen our understanding of its multidimensional nature.

Abstract In the present paper it is proposed that Machine Consciousness can be implemented by using either Finite State Automata or Production Systems. In both cases a possible behavior that may be characterized as exhibiting consciousness is the generation of an explanation of how it generates its final output.

Artificial consciousness, also known as machine consciousness or synthetic consciousness, is a field related to artificial intelligence and cognitive robotics. The aim of the theory of artificial consciousness is to "Define that which would have to be synthesized were consciousness to be found in an engineered artifact". Neuroscience hypothesizes that consciousness is generated by the interoperation of various parts of the brain, called the neural correlates of consciousness or NCC, though there

Currently (at the very beginning of 2008), machine consciousness has the status of a pragmatic attempt to use methodologies known in information, neuronal and control sciences both to throw light on what it is to be conscious and to aid the design of complex autonomous systems that require a non-living form of consciousness to act correctly in a complex world.

While the recent special issue of JCS on machine consciousness (Volume 14, Issue 7) was in preparation, a collection of papers on the same topic, entitled Artificial Consciousness and edited by Antonio Chella and Riccardo Manzotti, was published. 1 The editors of the JCS special issue, Ron Chrisley, Robert Clowes and Steve Torrance, thought it would be a timely and productive move to have authors of papers in their collection review the papers in the Chella and Manzotti book, and include (...)

Machine Consciousness - Bibliography - PhilPapers

Overall, the arguments against machine consciousness can be summed up as spiritual, and have no credibility as far as experimental evidence. Overall, the scales tip towards the possibility of machine consciousness. There are no real roadblocks to say it's not possible. In the end, we can't say with certainty either way.

The Future and Philosophy of Machine Consciousness | by ...

Awareness and self-awareness do not automatically lead to the emergence of motivation, desires or emotions. A conscious machine can be completely devoid of these processes, natural to humans. The intentionality of consciousness of Homo sapiens is due to evolution and is not obligatory for the machine.
