Even though I am a mathematician and not a biologist, I absolutely love reading like this book. I read 'The Cell' when it came out in the early 80s. It was a life changing experience. The diagrams alone in these texts tell a wonderful story. I bought 'Molecular Cell Biology' to compare with The Cell. Both books are wonderful.

The book starts with the basics of molecular biology - proteins, nucleic acids, genetic code, etc. It then considers nuclear functions in detail - replication, transcription and gene regulation in development.

The best molecular cell biology book out of the ones I went through. Becker's World of Cell - Avoids chemistry which is incomprehensible given that it's a MOLECULAR biology book. Succumbs to the typical failing in biology books - when in doubt, barrage them with facts.
