NEW YORK, NY—The New York City Economic Development Corporation (NYCEDC) and the Mayor ' s Office of Recovery and Resiliency (ORR) today released a newly updated Citywide Waterfront Inspection Guidelines Manual, a valuable resource that outlines standard operating procedures for inspecting City-owned coastal and waterfront assets. The updated manual, originally published in 1999, includes ...

Knights of New York is an informative and compelling book about the fire service, its beginnings, structure, terminology, and operations. The book especially highlights the operations of the greatest Fire Department in the world, the New York City Fire Department, better known as the FDNY. The story is narrated by FDNY Deputy Chief Eugene Ditaranto, Jr. and chronicles his career, however he is not the focus. Instead, the book sets out to emphasize and highlight all the members of the Department he was fortunate enough to work with. Knights of New York is an educational human-interest story covering significant events in the early 21st century and their effect on New York City and the FDNY. This book introduces readers to the FDNY in a unique way. Each chapter tells a real story then provides what the author learned regarding leadership, management, and commitment to service. Woven within each chapter are inspirational quotes and educational material for all professions, not just the fire service. The book covers everything from 9/11 to the COVID-19 pandemic. The perspectives of the members named in the book provide a treasure trove of information. Each member's named is listed by their final uniform rank in the rear of the book to forever memorialize their service and sacrifice.

This public domain book is an open and compatible implementation of the Uniform System of Citation.

It has, improbably, been called uncommonly lucid, even riveting by The New York Times, and it was a finalist for the 2004 National Book Awards nonfiction honor. It is a literally chilling read, especially in its minute-by-minute description of the events of the morning of 9/11 inside the Twin Towers.It is The 9/11 Commission Report, which was, before its publication, perhaps one of the most anticipated government reports of all time, and has been since an unlikely bestseller. The official statement by the National Commission on Terrorist Attacks Upon the United States-which was instituted in late 2002 and chaired by former New Jersey Governor Thomas Kean-it details what went wrong on that day (such as intelligence failures), what went right (the heroic response of emergency services and self-organizing civilians), and how to avert similar future attacks.Highlighting evidence from the day, from airport surveillance footage of the terrorists to phone calls from the doomed flights, and offering details that have otherwise gone unheard, this is an astonishing firsthand document of contemporary history. While controversial in parts-it has been criticized for failing to include testimony from key individuals, and it completely omits any mention of the mysterious collapse of WTC 7-it is nevertheless an essential record of one of the most transformational events of modern times.

The Air Compressor License Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam.

When an organization moves away from a generations-long tradition of being all-male toward a future that includes men and women equally, a significant change takes place. Change can be upsetting and threatening to those who are used to, and invested in, the way things "have always been." Fire may know no gender, but people do, and the fire chief of the 1990's spends more time managing people than controlling fire. Increasing numbers of women are becoming firefighters and fire officers, entering and advancing in a field that is still heavily male by both population and tradition. Fire service leaders who are not prepared to manage these workforce changes may find their workforce is managing them instead.

This version includes all 21 chapters of Essentials of Fire Fighting, 6th Edition and adds three chapters written and validated to meet the emergency medical and hazardous materials requirements of NFPA® 1001, 2013 Edition. Chapter 22 specifically addresses the Firefighter I and Firefighter II knowledge and skills requirements for the emergency medical care competencies identified in NFPA® 1001, 2013 Edition Chapter 4. Chapters 23 and 24 meet the First Responder Awareness and Operations Levels for Responders according to NFPA® 472: Standard for Competence of Responders to Hazardous Materials/Weapons of Mass Destruction Incidents, 2012 Edition and OSHA 1910.120. The chapters also provide validated content to meet Section 6.6, Mission-Specific Competencies: Product Control, of NFPA® 472. The hazardous materials information is adapted from the IFSTA Hazardous Materials for First Responders, 4th Edition.

The Master Fire Suppression Piping Contractor Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam.
