science and technology are the driving forces that will help make it better.

This is a romantic look back at southern foods and foodways. Typical of many other such books following the Civil War, there is a touching, nostalgic (condescending) evocation of the author's Mammy and her cooking. Painful as some of this is to read today, we find an underlying love and admiration for the Mammy and a feeling of loss for the "good old days." If one can pass by this aspect of the book, one can learn a great deal about an antebellum Southern kitchen. Every chapter contains good, solid Southern recipes. Many pages are required to discuss all the variations on the theme of the pig and pork: how to select, cure, pickle, make hams, hang hams, smoke, Render Lard, Prepare Fried Hog's Feet, Souse and Hog's Foot Oil and Jelly. We also have Barbecued Rabbit, Squirrel Smothered, Possum Roasted, Fried Chicken, Fig Pudding, Fried Pies, Sweet Potato Custard, Molasses Pie, Blackberry Mush, and Baked Peaches. There are sections on Creole Cookery, and fascinating discussions on the foods and festivities associated with special occasions - Weddings, Christmas, Birthday Barbecues, and Political Barbecues, among others.

Well written and easy to understand, An ILLUSTRATED GUIDE TO PRUNING, Third Edition is filled with updated illustrations, photographs, and examples designed to help readers understand and implement the appropriate pruning practices that are vital to developing sustainable structure in the first 25 years of a tree's life. With coverage of numerous different tree species as well as information about the challenges associated with pruning such as disease prevention, root pruning, mature tree pruning, and restoration following storms, students will be prepared to identify and understand good tree structure and pruning practices. Filled with simple tables, lists, and strategies, this completely updated guide to pruning makes it easy to teach the presented pruning techniques in accordance with nationally recognized ANSI A-300 standards. The Invention of Telepathy explores one of the enduring concepts to emerge from the late nineteenth century. Telepathy was coined by Frederic Myers in 1882. He defined it as 'the communication of any kind from one mind to another, independently of the recognised channels of sense'. By 1901 it had become a disputed phenomenon amongst physical scientists yet was the 'royal road' to the unconscious mind. Telepathy was discussed by eminent men and women of the day, including Sigmund Freud, Thomas Huxley, Henry and William James, Mary Kingsley, Andrew Lang, Vernon Lee, W.T. Stead, and Oscar Wilde. Did telepathy signal evolutionary advance or possible decline? Could it be a means of binding the Empire closer together, or was it used by natives to subvert imperial communications? Were women more sensitive than men, and if so why? Roger Luckhurst investigates these questions in a study that mixes history of science with cultural history and literary analysis.

More than 40 fabulous projects and 1,200 step-by-step illustrations offer users information they need to become master woodworkers.
