Issue Date July 2000. There are a host of potentially risky behaviors in which youth engage, which have important implications for both their well being as youth and their life prospects. The past decade has seen dramatic shifts in the intensity with which youths pursue these risky activities: for example, youth homicide fell by 40%; teen births decline by 20%; youth smoking rose by 33%; and marijuana use among youth virtually doubled.

using data from the MTF survey and the Youth Risk Behavior Survey (YRBS), which collected data for 1991, 1993, 1995, and 1997 on a large sample of ninth to twelfth graders. For both data sets, there are dramatic increases in the 1990s. In the MTF data, there is an increase of 7.2 percent-

Risky Behavior among Youths: An Economic Analysis

When considering risky behavior among youths, it is im- portant to avoid both opinionated moralism as to what is the right behav- ior and naive faith that sixteen-year-olds make no predictable mistakes in their choices. By identifying systematic patterns in errors that people make, behavioral economics provides just such an approach.
