clear, compelling way. I recommend it if you want to learn the principles of strategic communications and get structured suggestions to create better campaigns." Dave Chaffey, Co-founder and Content Director, Smart Insights This book has the strongest focus of online and offline integration of any marketing communications textbook. A blended approach to marketing is in its DNA. Compared to the competition that too often uses a bolts-on approach to integration, this book is essential for giving students the precise skills employers will look for - to be able to implement genuinely integrated marketing campaigns. This new, seventh edition combines professional and academic expertise to ground big picture theory into real-world case studies, drawing from cutting-edge global companies like Snapchat and Spotify, that will teach students the why behind the how. With increased focus on social media and the latest digital technologies, this new edition will teach students: - How AI, the Internet of Things, Big Data, AR/VR and marketing automation can be used successfully in campaigns - The opportunity and risks of social media - How to navigate ethical and data management challenges - How to use the current preferred digital marketing tools and technology Covering the key themes of customer engagement, experience and journey, this book will allow students to become truly confident working in an environment of ongoing technological transformation.

The digital world is characterized by its immediacy, its density of information and its omnipresence, in contrast to the concrete world. Significant changes will occur in our society as AI becomes integrated into many aspects of our lives. This book focuses on this vision of universalization by dealing with the development and framework of AI applicable to all. It develops a moral framework based on a neo-Darwinian approach - the concept of Ethics by Evolution - to accompany AI by observing a certain number of requirements, recommendations and rules at each stage of design, implementation and use. The societal responsibility of artificial intelligence is an essential step towards ethical, eco-responsible and trustworthy AI, aiming to protect and serve people and the common good in a beneficial way.

Guides businesses on how they can use the social media phenomenon to promote themselves, including how to create an attractive company profile, engage a target market, and develop an enthusiastic following.

The technical progress illustrated by the development of Artificial Intelligence (AI), Big Data technologies, the Internet of Things (IoT), online platforms, NBICs, autonomous expert systems, and the Blockchain let appear the possibility of a new world and the emergence of a fourth industrial revolution centered around digital data. Therefore, the advent of digital and its omnipresence in our modern society create a growing need to lay ethical benchmarks against this new religion of data, the "dataisme".

Nabbing flights for less than a fiver, Andrew Fraser took off on a month long jaunt around ten European cities for £ 144. In this entertaining account of his trip, he not only describes what he saw, but also how he did it, coaching aspiring travellers in how to create their own dream travel itineraries on flights which cost less than an airport latte. Join him on a bargain journey to some of Europe's weirdest, least visited backwaters, while also learning how to plan a ten-city adventure of your own. Andrew Fraser travelled 6,928 miles at an average cost of 2p per mile. Now you can, too. This unique title - the only one available that explains how to travel so far for so

little - takes in some of Europe's least discovered cities, including Skopje, Girona, Thessaloniki, Gdansk, Warsaw and Wroclaw, as well as giving an entertaining overview of some more familiar places, such as Barcelona, Rome and Brussels. It tells you how to book secret five star hotels for three star prices with no mystery about where you are going to stay, how to travel the world cheaply from your local airport, and how to save a fortune and create an adventure by abandoning the notion of the linear return flight. Uncovering the little known travel gems which you can fly to for under a tenner, it is also an often surreal, idiosyncratic and funny account of one man's adventures on the move, from attending an octopus autopsy in Barcelona to unearthing uncomfortable secrets in Europe's new Capital of Culture and discovering hip Warsovian apartments which straddle the worlds of Molotov and Madonna. What's more, it's a journey in search of culture, gastronomy and history and - on occasions - the seamier side of life in some of Europe's most thrilling but least known cities. Andrew Fraser is former Travel Editor and Deputy Editor of Attitude magazine, and former Chief Writer of OK! Magazine. He has had a love of the obscure, a love of bargains, and a love of travel since he was a strange eight year-old-boy locked in his bedroom obsessing over maps of Narnia-esque towns, cities and regions on the red side of the European map, which he was told he would never be able to visit. When the Berlin wall fell in 1989, he rushed to Prague, Bratislava and Budapest where he enjoyed the greatest adventure of his life so far, costing little more than pennies. Now the internet and low cost airlines, have brought back those halcyon days of cheap travel bliss and Andrew Fraser's mission in life is to transport you to places beyond your wildest dreams for less than the cost of your airport latte. Come join him.
