In the years after A Nation at Risk, conservatives ' ideas to reform America ' s lagging education system gained much traction. Key items like school choice and rigorous academic standards drew bipartisan support and were put into practice across the country. Today, these gains are in retreat, ceding ground to progressive nostrums that do little to boost the skills and knowledge of young people. Far from being discouraged, however, conservatives should seize the moment to refresh their vision of quality K – 12 education for today ' s America. These essays by 20 leading conservative thinkers do just that. Students, according to this vision, should complete high school with a thorough understanding of the country ' s history, including gratitude for its sacrifices, respect for its achievements, and awareness of its shortcomings. They should also learn to be trustworthy stewards of a democratic republic, capable of exercising virtue and civic responsibility. Beyond helping to form their character, schools ought to ready their pupils for careers that are productive, rewarding, and dignified. Excellent technical-training opportunities will await those not headed to a traditional college. Regardless of the paths and schools that they select, all students must come to understand that they can succeed in America if they are industrious, creative, and responsible. Anchored in tradition yet looking towards tomorrow, How to Educate an American should be read by anyone concerned with teaching future generations to preserve the country ' s heritage, embody its universal ethic, and pursue its founding ideals.

Reinhold Niebuhr remains at the center of a national conversation about Americas role in the world, and commentators with divergent political and religious positions look to his 1952 work, The Irony of American History, in support of their views. In this study, Scott R. Erwin argues that an appreciation of Niebuhrs theological vision is necessary for understanding the full measure of Irony and his perspective on life more broadly. Such a study is important because many individuals reading Irony today fail to acknowledge the central role that his Christian beliefs played in his writings. Niebuhr described his theological vision as being in the battle and above it, and it was this perspective that led Niebuhr, in Irony, to assert that America must both take morally hazardous action in combating the aggression of the Soviet Union and engage in critical self-evaluation to prevent the country from assuming the most odious traits of its Cold War foe. Niebuhr developed his theological vision over the course of the 1930s and 1940s through engagement with Christian doctrine, as most readily seen in his academic works such as The Nature and Destiny of Man, and with current events, as seen in his many journalistic writings during this period. By focusing primarily on Niebuhrs writings between 1931 and 1952, Erwin traces the development of his Christian interpretation of human nature and history, establishes how it informed his theological vision, and reveals how that theological vision underlies his writings on current affairs.

Nel Noddings advocates a unifying educational aim of producing better adults and presents strategies to achieve this in high schools.

This book provides an intellectual portrait of Robert Heilbroner. It traces the development of his work and places it within the literature of economic thought. The book finds that Heilbroner is a writer of political economy in the classical sense. His work is more reminiscent of Smith or Marx than of contemporary economic theorists. Heilbroner's economics is built on a solid foundation of social psychology, evolutionary dynamics and human history. This holistic approach affords Heilbroner a wide latitude to define the economic process and the discipline that studies it.

One of the foremost Native American intellectuals of his generation (1904-77), D'Arcy McNickleø is best known today for the American Indian history center that carries his name at the Newberry Library in Chicago, and for his novels, The Surrounded, Runner in the Sun, and Wind from an Enemy Sky. A historian and novelist, he was also an anthropologist, Bureau of Indian Affairs official during the heady days of ø the Indian New Deal, teacher, and founding member of the National Congress of American Indians. The child of a M à tis mother and white father, he was an enrolled member of the Flathead Tribe of Montana. But first, and largely by choice, he was a Native American who sought to restore pride and self-determination to all Native American people. Based on a wide range of previously untapped sources, this first full-length biogrpahy traces the course of McNickle's life from the reservation of his childhood through a career of major import to American Indian political and cultural affairs. In so doing it reveals a man who affirmed his own heritage while giving a collective Indian voice to many who had previously seen themselves only in a tribal context.
