Health care financing in upper-middle- and high-income countries is generally provided through health insurance schemes (often employment or union based) or governmental financing that is funded by general taxation. Governmental financing is severely limited in low-income nations due to lack of a significant tax base.

## ~~Health Care Financing—an overview | ScienceDirect Topics~~

People of working age today must finance the health needs of their children, themselves and, mainly, the 3<sup>rd</sup> and 4<sup>th</sup> generation. Labor contributions legislated thirty years ago are clearly not enough for today's medical costs Footnote 8 , while contributions sufficient to cover health costs thirty years from now would make labor extremely expensive.

~~Health care financing and the sustainability of health ...~~

Health Financing: The Macroeconomic Level. Financing health care has evolved from personal payment at the time of service delivery to financing through health insurance (prepayment) by the employer and employee at the workplace. This has progressed in most industrialized countries towards governmental financing through social security or general taxation, supplemented by private and non-governmental organizations (NGOs) ( Table 11.3 ), and personal out-of-pocket expenditures.

~~Health Care Financing — an overview | ScienceDirect Topics~~

Health financing is fundamental to the ability of health systems to maintain and improve human welfare. At the extreme, without the necessary funds no health workers would be employed, no medicines would be available and no health promotion or prevention would take place. However, financing is much more than simply generating funds.
